

Community Language – Chinese Year 2
2021 Learning from Home
Term 3 Week 2

Name: _____

L.I.: Months in the Seasons

S.C.: - I can understand why the months of seasons are different in China.
 - I can name the months in each season in China.

Go to Youtube and watch the video on seasons in the Southern hemisphere. Remember Australia is in the Southern hemisphere. <https://www.youtube.com/watch?v=061ePX3k-hA>
 We have looked at the months in each season in Sydney and did a worksheet on that.

zài xī ní , xià tiān shì shí èr yuè dào èr yuè , qiū tiān shì sān yuè dào wǔ yuè , dōng tiān shì liù yuè dào bā yuè , chūn tiān shì jiǔ yuè dào shí yuè 。
 在悉尼，夏天是十二月到二月，秋天是三月到五月，冬天是六月到八月，春天是九月到十一月。

Do you know when we have summer in Sydney, it is winter in China. So New Year is very hot for us but for the people in China, it is cold. Ask someone in your family to explain Southern and Northern hemisphere for you or go to <https://www.youtube.com/watch?v=b25g4nZTHvM>

Now try to do the months of the seasons in China ^{zhōngguó} 中国。

Complete the writing below by putting in the Chinese word whenever you see a blank box.

zài 在	zhōng 中	guó 国	,	dōng 冬	天	shì 是	十
二	yuè 月	到	二	月	,	chūn 春	天
是		月	到	五	月	,	夏
天	是		月	到	八	月	,
qiū 秋	天	是	九	月	到		
月	。	Well done!					

L.I.: Weather 天气

S.C.: I can add the weather to the Chinese date.

Remember 天(sky) 气(air) means the weather? We have learned the vocabulary for 3 types of weather.

qíngtiān
晴天

duōyún
多云

yǔ tiān
雨天

Remember how we do the date in Chinese? Start with the biggest ^{nián}年, then ^{yuè}月 and the smallest ^{rì}日 and then add days of the week ^{xīng qī}星期。

So today: 12/7/2021 will be like this in Chinese.

今天是二〇二一年七月十二日星期一。

Let's add weather to it.

tiān qì : duōyún
天气：多云

Now let's have a go.

Write today's date in the short date _____

Now write the Chinese date with the weather.

今	天	是					
					.		

天	气	:		
---	---	---	--	--

How did you do? A star ★ for your effort and an extra one ★ for getting it right!
