

L.I.: Australian animals àodàlìyà de dòngwù 澳大利亚的动物

S.C.: I can match the pinyin and Chinese characters of the names of the Australian Animals.

Hope you have fun with this week's activities. Try to finish this by Thursday.

We revised the Australian animals in 2 weeks ago. See if you remember their names.

Match the Chinese names with their pinyin by copying the pinyin into the box. Write their English name as well.

dài xióng	xiào cuì niǎo	kǎo lā/ shù xióng	yā zuǐ shòu	ér miáo	zhēn yǎn	dài shǔ
-----------	---------------	-------------------	-------------	---------	----------	---------

Chinese name	pinyin	English name
考拉/树熊 		
袋鼠 		
袋熊 		
鸸鹋 		
鸭嘴兽 		
针鼹 		
笑翠鸟 		

S.C.: I can find out where in Australia these Australian animals live.

Let's find out where these animals live: koala, kangaroo, wombat, emu, platypus, echidna and kookaburra.

Go to Google and type in 'Where do koalas live in Australia map?' and click on the first map. You will see they live along the east coast. Then go to the map below and draw the koala in the states or territories where they live.

Repeat the question for the other six animals.

Which animal lives all over Australia? _____

Thanks for trying and you deserve these  !
