

Maps

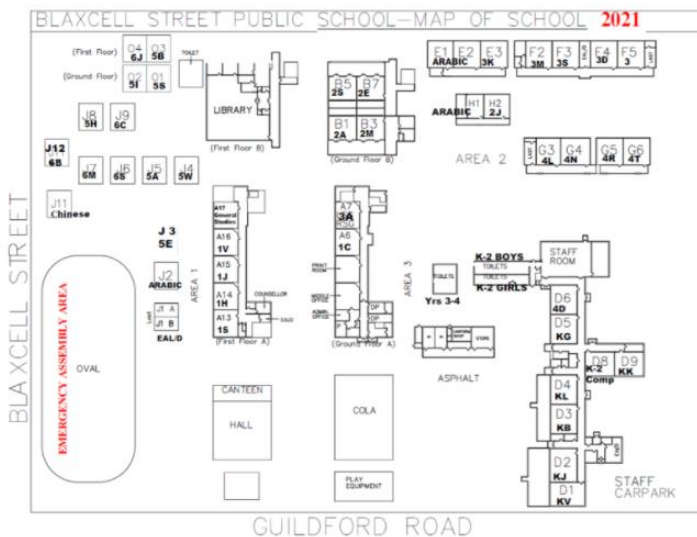

A map is a picture of an area of land or sea showing physical features, cities, and roads. Some maps show the 7 continents. This map shows that Australia is an island. It has the ocean as a border.

Maps can also show states. A state is a part of a country with a border. Did you know there are road maps that show a driver how to get to a destination?

Many maps use symbols. A symbol represents or stands for something else. Some maps use a compass rose to show north. Maps can also show capital cities. Do you know any capital cities?

We know lots about maps because we come to the best school. Here is a map of our school!
